TRINITY3 EDUCATIONAL PHILOSOPHY AND APPROACH TO PROFESSIONAL LEARNING

Trinity3 is deeply committed to the children we serve. We believe that in order to have a world-class, 21st century education, students must have access to reliable and inspiring technology and educators must be empowered to create an instructional shift with this technology. That's why Trinity3 leads our industry with sales support, warranties, whiteglove services, and flexible finance options that get quality technology tools into the hands of learners. However, we don't stop there. Our team of talented Professional Learning Specialists are passion driven to ensure that every educator we interact with is empowered with the skills they need to leverage technology to make learning relevant and engaging.

Most educators agree that there is no "one size fits all" when it comes to educating children. Education should be personalized, tailored to each child's specific needs and proclivities. Trinity3 extends this idea to professional learning as well. Although we do have a number of standard Professional Learning offerings, each training experience is highly customizable to meet the needs of our customers.

GOOGLE PROFESSIONAL LEARNING OFFERINGS

SWITCH 101

Switch 101 is designed for teams that are coming to Google for Education from a Windows, Mac, or iOS learning environment. We will examine together the relationship between these platforms and how to quickly get up and running with G Suite.

G SUITE CADRE

As Google Certified Trainers, our team of talented Professional Learning Specialists is ready to build a local leadership team for your Google deployment. This training is designed to lead educators to Google Level 1 or Level 2 certification. Beyond that, we will work with your team to help them build and facilitate a self sustaining system of localized training support.

VIRTUAL REALITY AND MORE

Our virtual reality training covers all the elements you expect, and a few you might not have seen coming. Google Expeditions is a fascinating and intuitive virtual field trip tool that your students and teachers will love. We cover this platform, then push learning to the next level by empowering students and educators with the tools they need to create their own virtual learning experiences using Google Tour Creator and 360° cameras.

MOBILIZE LEARNING WITH GOOGLE CLASSROOM

Learning should be 24/7/365. With Google Classroom, it can be. This training session will explore ways to leverage Google Classroom to streamline instruction and make learning accessible around the clock.

A MESSAGE FROM OUR PROFESSIONAL LEARNING MANAGER

I'd like to personally thank you for your interest in Professional Learning with Trinity3. I firmly believe that the most important factor in a child's education is educator effectiveness. There are a plethora of elements that have a tremendous educational impact. Access to technology, positive school culture, and community support; all of these are of significant value if we hope to provide a great learning experience to our students. However, a talented educator is able to overcome nearly any obstacle to bring her/his students to mastery of standards.

My work in school improvement began on day one of my teaching career, in the mirror.

I started my career as a high school math teacher in one of West Virginia's only urban schools. After that, I went on to become a technology coach and administrator focused on student engagement and school improvement. Before coming to Trinity3, I spent 7 years at the West Virginia Department of Education helping to close achievement gaps among students with effective teaching strategies and leadership building.

Our team brings decades of experience and passion for student achievement to our customers. We look forward to serving you and your students.
