ELLEVATION

# A Better Way to Manage ELL Programs

Ellevation:

Analyze Your Student Data and Enable Effective Collaboration Across the District

Ellevation's data tools allow you to easily understand your students. By leveraging the power of our Homepage Dashboard and Student List, you can:

- Gain actionable insights about your students, such as who is progressing and who needs supports
- Organize and visualize your data
- Share critical data about what matters most across your district

You can also use Ellevation's workflow tools to:

- Assign digital monitoring forms to gather teachers' input
- Share digital ILPs with teachers
- Add and store digital documents to your students' Ellevation profiles

Ellevation Strategies:

Leveraging Best Practice Instructional Activities

Access our collection of instructional activities that integrate into prove learning outcomes for ELLs. Teachers can:

- Find the right instructional activity with relevant connections to academic content and essential differentiation supports.
- Better understand student abilities and plan accordingly using data
- Utilize the 6 Best Practices and Instructional Framework to better meet the linguistic needs of ELLs

ELLEVATION

Here's how stakeholders in your district can use Ellevation

District Admins (ELL Coordinators)

Reduce time on administrative tasks by 70% by unifying your ELL data sources

Gain visibility into program data and processes

Ensure compliance and enable your ELL team to focus on instruction

Make key ELL decisions and share with specialists and classroom teachers

Provide PD to the ELL department and classroom teachers by tying student proficiency data to classroom supports

Principals

Track performance against ESSA targets

Get insight into your ELL student population

Use reports to make site-based decisions to promote growth of ELLs

Analyze student data and create, save, and share reports with others in your district

Specialists

Access student data to monitor growth and inform decisions

Record ELL decisions (i.e., program placements, service adjustments, meetings, etc)

Focus on instruction by simplifying compliance processes

Share and assign instructional activities with classroom teachers to incorporate into existing lesson plans to differentiate instruction for ELLs

Create reports and dashboards to share out with others in your school and district

Teachers

Gain a deeper understanding of your students' backgrounds and proficiency levels

Identify students needing attention by reviewing ELP assessment growth by domain

Incorporate our digital instructional activities into existing lesson plans to teach language through content

Provide informed feedback using student data in Ellevation

Create and share notes (in students' records) with other teachers working with ELLs

Curriculum and Instruction

Leverage research-based instructional strategies to improve instruction and enhance district curriculum across every content area and grade level!

Equip every teacher with strategies to build instructional capacity for teaching all learners

Provide consistent instructional resources across schools, grade levels, and content teams with fidelity

Provide actionable resources that support existing initiatives such as SIOP, GLAD, Danielson, CREDE, QTEL, and more

Prepare districts with an easily implemented structure that supports coaching and development for the benefit of students
