

BUILDING AUTOMATION

Building Automation

Providing maximum efficiency and peak performance solutions for your building.

Your Partner in Building Automation

Building Automation Systems are the brain of your building, so it's important they integrate with all your systems and remain healthy. We can help ensure they are installed correctly, run efficiently, and do the thinking for you.

From before your project breaks ground through the life of your building, our team is there to help you plan, execute, and maintain your facility. We specialize in:

- New Construction
- Upgrades & Retrofits
- Installation
- Service, Maintenance & Repair
- Building Analytics
- BAS Design
- System Integration
- Mechanical System Optimization
- Lighting Upgrades
- Financing Options

Commitment to Open Systems

LONG selects product partners who are leaders in innovation and open systems. Our product selection provides you quality, high-tech solutions and software for cross-product communication.

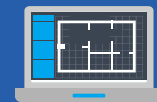

The LONG Difference

We are committed to offering holistic solutions that fulfill for your specific building automation needs. Our staff includes in-house electricians and highly trained technicians that provide expert installation with every project, ensuring your building is compatible and working efficiently.

PLANNING

Every successful project starts with a solid plan. LONG specializes in **New Construction**, providing **BAS Design**, by expert application engineers, using state of the art software.

EXECUTION

Our in-house electricians provide precision **Installation** and **Systems Integration**. Connect real-time **Building Analytics**, to ensure your building runs at peak performance.

SERVICE

Preventive maintenance is the key to any efficient building system. Our team provides **Scheduled Service, Maintenance, and Repairs**, as well as **Upgrades** and **Retrofits**.
