ELLEVATION

Streamline your MLL program management

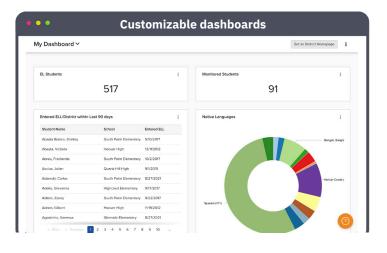

Ellevation Platform provides end-to-end monitoring and instructional planning for multilingual students. Everyone across the district is able to easily access and understand student proficiency levels, descriptors, and supports. From there, they are able to track student progress, set informed goals, and share instructional accommodations.

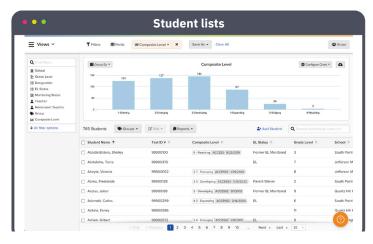

View student data - all in one place

Dynamic data views and dashboards help keep teams informed with the right student data at the right time. From deep language proficiency information on an individual student, to roll-up reports and data views across your district, we provide everything your team needs to make informed decisions about goals and progress.

Make informed instructional decisions

Meeting as a team to make recommendations on accommodations, services, program placements, and goals is an important part of ensuring that all EL students receive the appropriate language development support. Streamline them through customizable meeting workflows and easily track your EL students' program placements. Combined demographics,content, and language assessment data provides a holistic picture of students' backgrounds to drive effective instruction.

Streamline administrative processes

For many school districts, monitoring current and former EL student progress often creates significant paperwork and less than actionable data - not with Ellevation! We bring the entire process online, allowing you to fulfill your program compliance obligations, act quickly on decisions, and make the process of gathering feedback simple, timely, and accurate.

- MLL and ILP student plans
- Parent letters in 35+ languages
- Cumulative folder reports
- Accommodation reports

Make implementation turn-key

Ellevation's data-sharing agreements make implementation turn-key by saving time because data syncs happen automatically, ensuring a more comprehensive view of a student including strengths and areas for growth, and providing timely and actionable data since most updates happen nightly.
