### IEP Online for Special Education and 504

IEP Online is available with Washington State compliance rules and a standard set of special education and 504 forms already in place. The centrally hosted implementation of IEP Online provides the software to school districts at a discounted price and is made available through a partnership of WSIPC. The program allows for multiple implementation options, including an option for districts that are not members of WSIPC.

### Behavioral Threat Assessment

PCG's robust BTA solution fully supports Level 1 Site-Based Assessment and Level 2 Community-Based Assessment protocols used in behavioral threat assessment. The system was designed to fully support the Salem-Keizer Cascade Student Threat Assessment model. Additionally, the common intake form enables staff to assess Threats to Others and/or Threats to Self, using proven methods to inquire, assess, document and manage students with concerning behaviors.

### IEP Online Translation

IEP Online Translation is a cost-effective tool that empowers districts and schools to provide student documentation to parents in their native language. Now users can instantly produce translated IEPs, 504s, and other education documents for families in advance of, and immediately following meetings.

**[NEW] Translation Flat Rate Pricing:** PCG and WSIPC are excited to announce a new pricing option for Translation called Flat Rate Pricing. This pricing option includes unlimited pages, unlimited users, and a one-time flat rate fee which will be invoiced once per contract/school year. To find out more about **Flat Rate Pricing** options, contact Kris Gregoire at [KGregoire@pcgus.com](mailto:KGregoire@pcgus.com).

### Medicaid Claiming & Billing

PCG provides clients with a comprehensive service and time-saving technology. Integrating Internet and mobile technology solutions, clinicians can easily and conveniently document services at any time without the need for scanner forms and paper logs. PCG partners with districts and schools for full-service Medicaid claiming services.

### EDPlan Progress Track™

EDPlan Progress Track, is a web-based progress monitoring tool, that can be used with IEP Online to provide users with simple data collection on IEP goals to proactively facilitate problem solving, enhance student learning, and improve educational outcomes. Administrators can also analyze their student achievements and areas of concern district-wide, by school, by groups of students, and by teacher, to help determine if they need to assist their teachers by offering alternative methods and/or approaches to achieve student success.

### IEP Online Connect Parent Portal

IEP Online Connect is a comprehensive online portal designed to help districts, administrators, and educators promote family involvement in a child's education. With IEP Online Connect, caregivers have a centralized, secure place to access student records online in their native language, review and sign documents, and save time through a user-friendly tool.

### EDPlan Insight Data Analytics System

EDPlan Insight is an intuitive technology platform designed to encourage and support a district-wide culture of data use focused on special education, from the school building, support services, and up to the district office. The platform provides special education district staff a 'one-stop-shopping' experience for accessing school and student-related data (visualizations analysis and reports) accessible on most any device in near real-time.

### Equipment Online for Assistive Technology Tracking

IEP Online's Equipment Online provides an integrated module to track, monitor, and assign equipment, such as assistive technology, hardware, software, or other devices, throughout the district. Information is stored historically for both equipment and students to track equipment throughout its life cycle in the district. Equipment Online is available to entire school districts or specifically for Special Education assistive technology.
