

Cybersecurity Services

THE CHALLENGE

Digital transformation combined with remote working have accelerated cloud adoption and cyber risks. Additionally, with skilled talent shortages, organizations are finding it hard to meet security standards and compliance requirements. Presidio clients are confident that their cybersecurity posture is strong.

THE SOLUTION

Presidio understands cyber. Clients who engage with Presidio will discover flexible solutions that will meet their specific needs. From individual cyber challenges to the establishment of a Security Operations Center, Presidio works with clients to identify gaps, protect sensitive data, and respond with industry leading technologies and automation.

Presidio has seen every kind of cyber challenge.

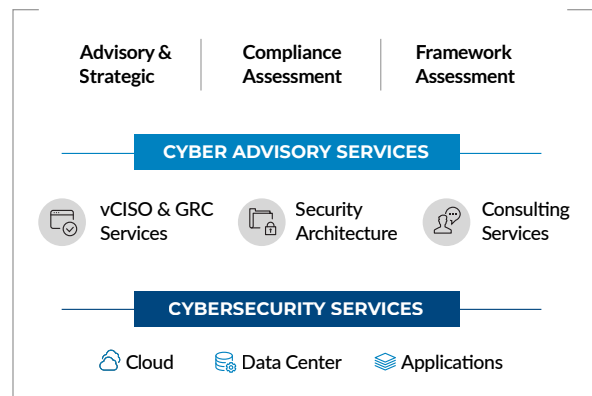

Talk to us about:

- ◆ Governance, Risk and Compliance
- ◆ Incident Response and Digital Forensics
- ◆ Risk Advisory (vCISO) Services
- ◆ Security Architecture Services
- ◆ Vulnerability Management and Penetration Testing

Presidio recognizes that every client is unique. We consult with clients to understand their specific needs, then architect, design, implement and manage prioritized initiatives. We are certified in every aspect of cybersecurity, and we invest in staying current with the latest technologies. As a result, our clients benefit from a vendor-neutral approach to understand their specific needs, then architect, design, implement and manage prioritized initiatives.

Our team has hundreds of years of combined experience engaging in thousands of client engagements across industries. We are certified in every aspect of cybersecurity, and we invest in staying current with the latest technologies. Our clients benefit from a vendor-agnostic approach to recommending and implementing the best solution for a given concern.

PRESIDIO'S END-TO-END SOLUTIONS

KEY BENEFITS

Presidio's Cybersecurity Practice enables our clients to run their business safely.

Our solutions cover key areas including:

- Securing the Cloud
- Securing the User
- Securing the Data
- Securing the Perimeters
- Securing the Supply Chain

Our focus is on solving key challenges in Cybersecurity:

- ◆ **Regulatory Compliance**
Implementing and managing standards-based policies; testing and validating the cybersecurity implementation.
- ◆ **Vulnerability Management**
Reducing incidents and breaches while keeping up with evolving threats.

Cybersecurity Services

◆ Incident Response

Leveraging the latest technologies and techniques to rapidly isolate and remediate.

◆ Identity & Access Management

Verifying that human and non-human accounts are who/what they claim to be and providing those accounts the appropriate access only when needed.

◆ Security Program Development

Prioritizing a cybersecurity strategy for each client.

◆ Privacy Program Development

Implementing protections for sensitive data.

◆ Lack of Skilled Personnel

Retaining skilled cyber resources that are hard to find. Keeping current with the latest risks and certified on multi-vendor technology innovations.

◆ 24 x 7 x 365 Coverage

Managing services, monitored and operated every minute of every day to support the highest levels of security and to respond in seconds.

WHAT MAKES US DIFFERENT

Presidio is a trusted partner to our clients, securing their infrastructure, employees, customers and assets from ever-growing cyber threats. Our clients trust Presidio:

Experienced Team

With our disciplined team of security practitioners, Presidio recommends and delivers the right solution to meet the cyber challenges of each client.

Cyber Intelligence

Presidio's cyber intelligence data is comprised of knowledge from thousands of data sources, dozens of cyber products, transactions and events, supporting rapid detection and response in a managed services deployment.

Speed

Presidio's deep knowledge of every layer of the IT and cyber architecture, combined with proven methodologies supports responding in record time to potential threats.

WHY PRESIDIO

Presidio is a leading digital systems integrator, with deep experience in networking, cloud computing and broad hybrid infrastructures.
