

# ASSETS

#### KNOW THE STATUS OF ALL YOUR ASSETS. MAKE LIFE EASIER ON YOURSELF DURING AUDITS. SIMULATE DEPRECIATION WITHOUT RESORTING TO A CALCULATOR.

- Account for and valuate all of your existing assets
- Reduce the possibility of overstocks and shortages
- Identify asset location and type
- Log additions and disposals for review by auditors

## MONITOR ASSETS IN MULTIPLE LOCATIONS

Are your assets scattered throughout the district? No worries. From acquisition to disposal (and everything in between), you can record, maintain, and report all of your fixed assets for each site according to GASB 34 standards.

#### **AUTOMATIC ASSET CREATION**

Why spend time re-entering asset information when you can generate it from purchase orders or invoices already entered into Accounts Payable? It's just one more step of redundant data entry for you to clear off your plate.

### CALCULATE AND APPLY DEPRECIATION SCHEDULES

We make it easy to determine your capitalization threshold amount. Set up depreciation schedules monthly, quarterly, biannually, or annually.
