

FOOD SERVICE

FROM THE LUNCH LINE TO YOUR STUDENTS' HOMES, A BETTER FOOD SERVICE EXPERIENCE AWAITS.

- Online payments with a credit or debit card
- Upload direct certification files and pre-qualify students
- Custom POS screens for each lunch line
- Move lunch lines along faster
- Pre-built reports for low balance and state reporting

THE REAL-TIME ADVANTAGE

From hot lunch head counts to food allergies, sometimes a few hours can make all the difference. New students are automatically available in the food service system, student pictures pop up on their way through the lunch line, and alerts are readily available to keep your students safe. You shouldn't have to worry about whether your information is up to date. Now, you'll know it is.

BETTER INFORMED PARENTS

Parents can log in to Family Access to check lunch balances and see what their students are eating. You can set up automatic notifications when lunch balances are low and even give your parents the ability to reload accounts with online payments.

A WEALTH OF OPTIONS

Skyward's partner program means you can upgrade to new POS terminals, touch screen monitors, or programmable cash drawers without having to worry about compatibility. Speed up the line with keypads, barcode readers, and even biometric scanners to quickly identify students.
