

REPORT WRITER

DRAW-AND-DROP EDITOR. ACCESS TO EVERY FIELD. FULL CONTROL OVER WHO GETS WHAT AND WHEN.

- Choose your own styles, layouts, and branding
- Manage reports by category/area
- Deploy reports to selected areas of the system for those who need to know
- Automatic notifications when new reports are ready for viewing
- Sharing options include email, message center, and network location

POWERFUL REPORTING AND ANALYTICS

When running reports, most systems require users to pull data from various tables, then cut, paste, and rearrange to create the report they actually want. Qmlativ's built-in report writer easily generates the reports you need so you and your staff can make better-informed decisions.
