Every day in school administration leadership, you take on the responsibilities of acting as the bridge between the school and the community, setting goals, managing operations, guiding curriculum development, and overseeing student well-being. But it's not without its challenges. Ensuring timely grading from faculty, balancing schedules, interpreting assessment data, and implementing changes with stakeholder buy-in can be tough.

Your Cooperative understands these demands. Drawing from insights of school administrators, we've crafted solutions in Skyward's Qmlativ® School Management System to ease these burdens and empower you to excel.

BENEFITS OF THE QMLATIV SOLUTION:

Qmlativ solutions are built to help you manage your tasks with ease, with enhanced features to provide a more seamless experience:

FAMILY & STUDENT ACCESS

- Family and Student Access portals allow families to access student information anywhere, at any time.
- Family and Student Access features the Qmlativ tile-based dashboard to maximize ease-of-use.

GRADING

- Grades no longer require posting, but are live throughout the system until end-of-term.
- Grades become complete at the end of the grading period, enabling consistent viewing or reporting from any portal.
- Flexible grading periods can be created within a course to suit unique needs and circumstances.

SCHEDULING

- Provides flexibility in schedule building without needing to do background setup beforehand.
- Allows for custom naming of class periods with any alphanumeric combinations.
- Calendar days can have multiple bell schedules tied to them, allowing for easier setup of custom schedules.

DATA ANALYSIS

- Enjoy at-a-glance records with live tiles and chart tiles on the dashboard.
- Custom Reporting allows reporting from any table within the database.
- System Mass Update Utility allows for changes to be made on any table within Qmlativ.
- Import Designer allows for custom imports to be built to update any table from a spreadsheet or data file.
- Dedicated APIs connect third-party systems.
