

COLLEGE & CAREER READINESS

GIVE COUNSELORS, STUDENTS, AND PARENTS THE BIG PICTURE VISIBILITY THEY NEED TO MAKE BETTER DECISIONS.

- Map courses to graduation requirements
- Track future courses based on desired outcome
- Parents will have a clear synopsis of student progress
- Counselors can make recommendations based on a chosen path

Sub Area Description	Required Credits	Completed Credits	In Progress Credits	Future Credits	V
SOCIAL STUDIES	3.000	1.000	0.000	0.000

KEEP YOUR STUDENTS ON TRACK

Create unique graduation plans for each school, or even for an individual student. Track district-wide progress toward graduation and determine whether there are any gaps that need to be filled. Counselors can get an instant snapshot view of how a student stacks up against state, school, and individual plans, making intervention a breeze.

ADAPT TO NEW CURRICULA

As a curriculum changes, the system will automatically update which subject and area of graduation requirements it meets. With pre-loaded state standards, there's no need to spend any additional time on data entry.

CAREER PLANNING

Create a four-year career plan for each student, so the big picture is available to them throughout their secondary years. Students can take control of their career planning through the student portal by laying out their curriculum in advance.
