

# CURRICULUM MANAGEMENT

DISTRICT-WIDE MAPPING FOR STANDARDS, BENCHMARKS, GOALS, AND MORE.

- Assign prerequisites and custom requirements
- Build and map academic standards
- Link curriculum to graduation plans

The screenshot shows the Skyward Curriculum Management interface for City High School - 402. The main section displays the 'PLANS' table, which lists graduation requirements. Below this, the 'SUB AREAS' table is visible, showing a list of sub areas with their respective application orders, descriptions, and credits.

Application Order	Sub Area Description	Grad Year Low	Grad Year High	School Year Low	School Year High	Maximum Percent	Allow Reuse of Previously Applied Credits
1	English 9	2024	9999	0	9999	100.00	<input type="checkbox"/>
2	English 10	2024	9999	0	9999	100.00	<input type="checkbox"/>
3	English Electives	2024	9999	0	9999	100.00	<input type="checkbox"/>
4	General Electives	2024	9999	0	9999	100.00	<input type="checkbox"/>

## PROMOTE TEACHER VISIBILITY

Teachers can see the activities, assignments, and resources they need to cover for each unit. The flexibility that comes with being able to tie individual lesson plans to district-wide benchmarks will save time on both ends and help ensure that there are no instructional gaps.

## DRIVE CONSISTENCY

Map standards and assessments to the curriculum, so student progress can be tracked on an apples-to-apples basis throughout the district. With curriculum mapping, you can control the number of unknown variables that go into analyzing teacher and student performance. Consistent expectations are there to help you lead.
