

TEACHER TASKS MADE EASIER WITH QMLATIV

There's a lot to do inside the classroom: juggling prepping, teaching and grading materials, managing attendance and seating, and troubleshooting basic tech issues and behavior. Coaching, advisory roles, and activities also keep you on your toes, often in different locations throughout the day. All of these tasks come with their own set of hurdles. Limited resources, gradebook inconsistencies from late assignments, ever-changing learning modifications, decreased communication with families, and disruptive behavior can strain your efforts.

Your Cooperative and Skyward recognize these challenges. By taking suggestions from educators like you, Skyward has developed solutions in the Qmlativ® Student Information System to help streamline your workload and enhance your effectiveness in the classroom.

BENEFITS OF THE QMLATIV SOLUTION:

Qmlativ solutions are built to help you manage your tasks with ease, with enhanced features to provide a more seamless experience:

GRADEBOOK

- Grades no longer require posting, but are live throughout the system until end-of-term.
- Grades become complete at the end of the grading period, enabling consistent viewing or reporting from any portal.

ATTENDANCE

- Drag and drop desks to create easily identifiable layouts and organize desks in different types of groups.
- Live-tile dashboard links to specific daily attendance screens for each class.

TEACHER ACCESS

- Personalize and design the live dashboard for the tools you use most.
- Access teacher tools at any time from any mobile device.
