

CYBERFORCE | 

Proven Cybersecurity Program Advancement

**Protecting the cyber realm as a collective
force for good since 1995.**

WHO WE ARE

CyberForceIQ is a collective force for good to protect the cyber realm. We have been providing information security services for over three decades. We architect and implement quantifiable cybersecurity programs for organizations of all sizes – with proven results.

By providing professional resources 24x7x365 to best support your organization's cybersecurity program advancement, you can count on us for process improvement, automation, and to deliver predictable and measurable results.

We enhance your cybersecurity capabilities, allowing you to concentrate on your core strengths. Participants are innovative leaders who share optimal strategies to implement a proven model. Together we accomplish the ultimate mission.

COLLABORATION

We are dedicated to cultivating strong relationships and enhancing cybersecurity as a united front. Together, we aim to tackle the ever-evolving challenges posed by cyber threats and protect our constituents, staff, and organizations from potential risks. As a participant-driven collective, each participant plays an instrumental role in shaping the group's direction, growth, and evolution.

We collaborate through the following communication opportunities:

- Collective communication platform and knowledge base
- Daily collective and collaborative threat briefing
- Access to collective threat intelligence platform and threat feed
- Collective capability benchmarking and reporting
- Collective workgroups & incident training
- Annual capabilities workshop and networking

Collaboration drives innovation, strengthens relationships, and ensures collective success together.

OUR ELEMENTS

COLLECTIVE

CUSTOMIZABLE

TACTICAL

QUANTIFIABLE

OUR SERVICES

Protecting your business from cyber threats has never been more important. At CyberForce|Q, we offer a range of services designed to protect, strengthen, and enable your cybersecurity program.

Collective Security Operations Center

Our CoSOC protects your organization 24x7x365 monitoring your environment to Detect, Analyze and Respond to malicious cybersecurity threats in real time. Providing tactical, collective, managed detection and response.

Cybersecurity Assessment

Advance your cybersecurity program through one-on-one sessions to establish a baseline assessment and develop a strategic action plan to focus on continuous advancement through evidence-based metrics.

Technology Operations

Through our skilled and highly experienced engineers we work to help deploy, implement, and manage your technology services. We are technology agnostic, and our team will be there to provide advancement in your technology capabilities.

Penetration Testing

As a part of our participants security process, we provide comprehensive penetration testing services to test your exposure to outside and inside risk. An action plan is created and working together we can mitigate your risk.

vCISO

We help to provide strategic guidance and assist you in prioritizing your business operations. We help create a risk-based strategic roadmap and deliverables that are vital to establishing, transforming, and maintaining regulatory compliance objectives and advancing your cybersecurity posture.

Incident Response

Our digital forensics and incident response team offer expert guidance in developing and managing comprehensive incident response solutions. We can provide quick identification, containment, and mitigation of security incidents, minimizing the impact on your organization.

ADDITIONAL SERVICES INCLUDE:

- SIEM Deployment and Management
- Table Top Exercises
- Business Continuity Planning
- Governance Consulting
- Technology Implementation & Management
- Phishing & Related Training

CLIENT TESTIMONIALS

"Spreading the word about CyberForceQ! They are amazing to work with and if you need help they are always there. If you are a hospital in need of help or a partner to advance your cybersecurity program, reach out to them now! CyberForceQ will help with not just their knowledge, but about cybersecurity for hospitals big and small. They make it a safer world out there for us."

Technology Manager, Rural Hospital

"The collaborative environment at CyberForceQ is outstanding. Daily huddles, QIFRAME, security information sharing, and through the events they host."

Vice President and CISO,
Hospital System

"In our darkest hour of a ransomware event, I turned to CyberForceQ for their leadership and investigative expertise in dealing with such matters. Their IRT quickly assembled and joined our IRT working with us 24/7 to immediately address our utmost concerns. As our case progressed, CyberForceQ continued to provide the highly technical detail we needed to navigate through to a resolution."

Vice President of IT,
Private University
