Absorb Analyze

Every choice should be informed, and every action measurable. Assess, evaluate and compare the impact of your learning program with Absorb Analyzes' powerful, self-serve Business Intelligence (BI) capabilities.

How does it work?

Seamlessly embedded into the Absorb LMS admin experience, Absorb Analyze takes data from your Absorb LMS database—like course enrollments, logins and assessments—and transforms it into data models. With these models, Absorb Analyze lets you and other administrators create customized, shareable dashboards. Are you short on time? No problem—take advantage of a pre-configured dashboard templates that are ready to be copied and repurposed.

Bolster your learning and development strategy with tailor made, interactive reports to analyze learner progress, capture data-driven insights and identify learning trends. Absorb Analyze enables your learning and development team to understand how content is performing, how learners engage with content, and helps your business make fast, informed decisions.

Who is it for?

Organizations of any size can use Absorb Analyze to unearth powerful insights from their LMS data.

Larger enterprises can compare data across departments and adjust learning plans for each group. They can also incorporate their findings into performance evaluations and broader learning initiatives.

Extended enterprise organizations— those that provide training to partners, customers, resellers and vendors—can examine data insights to understand how these external groups are performing and where to invest more heavily. Groups will appreciate the shareable reports, which help shape their own improvements and learning opportunities.

Key Benefits of Absorb Analyze

Configurable Dashboards

Easily create and modify interactive dashboards at any time, without having to provide requirements or wait for BI development time.

Comparable User Data

Quickly display and compare data for multiple learners, courses and enrollments in a single widget or dashboard.

Trends and Forecasting

Observe, analyze and predict learning trends from your data with user-friendly visualization tools.

Narratives

Capture plain language interpretations of your data through the specialized narrative widget, which automatically generates text summaries.

Pulse Notifications

Receive automated alerts to specified report viewers when milestones are hit, on track or lagging.

Integrated with Absorb LMS

Seamlessly access Absorb Analyze from within your administrator's dashboard.

Shareable, Interactive Reports

Schedule and share interactive dashboards with others, allowing them to view data within their user management scope, apply filters and more.
