

ABSORB ANALYZE ESSENTIALS OVERVIEW

Understand your learners and learning program better, with the fully customizable and easy-to-use report building capabilities of analyze essentials.

How does it work?

Analyze Essentials is a custom report building tool that allows you to access powerful learner insights with an easy-to-use workflow. Simply select the learner and course data you want to include, and create custom reports from the ground up with no technical effort or skills required. Design reports around your unique use case to answer the questions your organization needs by selecting fields, adding filters (such as Department, Course, and Users), and customizing how the filters should apply to your data set. With Analyze Essentials, you can preview, save, generate, and schedule reports. Make data driven decisions based on the information gathered in the custom reports and continue to optimize your learning program.

Who is it for?

Whether you are training your employees or learners outside of your organization, Analyze Essentials provides Admins with the ability to build custom reports that provide deeper and more meaningful data on your learners and learning program.

Why would you need it?

- If you have complex reporting needs that require combining data from multiple core LMS reports, such as reporting on multiple course types or across departments in a single report.
- You want to reduce or eliminate the use of external reporting tools such as Excel or business intelligence tools.
- You want a self-serve means for anyone in your organization to be able to create tailored reports, even if they are not technical experts.

Key benefits of Absorb Analyze Essentials?

Actionable insights

Continue to optimize your learning program with the ability to make data driven decisions based on the information gathered in Analyze Essentials reports

Fully customizable

Create a report from the ground up and customize it to fit your specific use case and needs

Easy to use

No need to be a technical expert – Analyze Essentials offers a simple workflow that allows you to build reports by selecting and reordering the fields you want to include

Flexible user access

Admin users can grant access to an unlimited number of users so they can create their own custom reports

The extended Analyze options

Looking for even deeper analytics and insights from your learning data?

Absorb Analyze BI is the Absorb business intelligence tool where organizations can create visual dashboards, use AI to build these dashboards, and get forecasting and trends based off your learner data.

Have your own BI tool already and want your learning data to be exported into it?

Absorb Analyze Direct is the data direct export option that automatically keeps your data up-to-date in your organizations BI tool.
