

## TECHNICAL

# DISTRICTPULSE

IN THE RAPIDLY EVOLVING LANDSCAPE OF EDUCATIONAL TECHNOLOGY, THE NEED FOR ROBUST ANALYTICS TOOLS HAS NEVER BEEN GREATER. DISTRICTPULSE, SKYWARD'S NEW ANALYTICS TOOL, IS THE ANSWER YOU'VE BEEN LOOKING FOR.

**Note:** DistrictPulse is not part of the core set of Qmlativ modules but can be added for an additional fee.

- Curated at-a-glance analysis, visuals, and data sets to guide the district, to answer key questions, and to give insight into trends
- Customize dashboards, reports, and analytics to meet your specific needs
- Enhanced Security
- Direct integration with Qmlativ

## CURATED ANALYSIS AND DASHBOARDS

The Skyward team has built canned analysis with curated data sets to greatly reduce the time and effort required to roll out a Business Intelligence solution. The effect is a fast turnaround from purchase to full implementation. Within the application, your users will find an intuitive interface that simplifies data visualization and analysis. Your team will be able to explore navigable dashboards and easily filter the data across school years, campuses, and data without needing advanced technical skills.

## CUSTOMIZE DASHBOARDS, REPORTS, AND ANALYSIS

The DistrictPulse solution is built using Amazon Web Services (AWS) Quicksight. The power of this solution will help get the most out of your data by allowing authors to customize visualizations to guide your district and to provide insights to your data that you may not have known.

## ENHANCED SECURITY

The Skyward team has developed the DistrictPulse solution to work with your existing Qmlativ security. By leveraging the row-level security in Qmlativ, you will not only protect your data consistently between these products, but also greatly reduce the effort it would typically take to roll-out a solution.
