TILES/DASHBOARD/ WIDGET

SEE WHAT IS HAPPENING IN YOUR DISTRICT AND SCHOOLS IN REAL-TIME

SKYWARD® **Qmlativ**®

WSIPC

- View and interact with live data right from your dashboard

- Eliminate the need to generate reports to see what is happening in your district

- Personalize your dashboard to provide the data that you need

USE THE PRE-DEFINED DASHBOARD WIDGETS TO ENGAGE

Using the pre-defined library allows you to quickly select interactive widgets for your dashboard. You can interact with many of these widgets by grouping data in various/multiple ways and setting filters to specify what data you wish to view. All widgets allow drill-down capabilities to see the detailed information.

CREATE PERSONAL TILES TO MEET YOUR SPECIFIC JOBS NEEDS

In addition to the library tiles, a user can create personal tiles related to the specific data they need to see on their dashboard. This allows them to be more efficient in accessing and reviewing data. Personal tiles can not only display data but can show a user if they need to take action on data entered by other staff.

STAY INFORMED

The dashboard tiles and widgets allow you to stay informed and up-to-date with what is going on in your district and schools at a glance. A user can see the information they need live and in real-time on their main dashboard and eliminate the need to run a report to gather data.
