ASSESSMENT SCORES

MAINTAINS DISTRICT AND STATE DEFINED ASSESSMENT SCORES FOR YOUR STUDENTS

- Easily import assessment files into Qmlativ and apply to the individual student record
- Include assessment score in report design and visualization
- Use assessment data within Qmlativ as Student

The screenshot displays the Skyward Student Profile interface. On the left, a sidebar lists various student data categories like Attendance, Acad History, and Enrollment. The main area shows the 'STUDENT TESTS' section with a table of assessment records. A 'STUDENT TEST DETAILS' panel on the right provides a breakdown of scores for different subjects and tests.

Assessment	Date Taken	Test	Version	School Year	Grade
ACT	04/07/2023	ACT	2016-2017	2022-2023	12
EXPLORE	02/01/2023	EXPLORE	Default	2022-2023	10
SMART-3.6	10/14/2022	SMART-3.6	2021	2022-2023	20

Test	Score
English Scale Score	15
Math Scale Score	17
Reading Scale Score	19
Science Scale Score	18
Composite Score	19
Writing Subject Score	8
ELA Score	9
STEM Score	11

IMPORT ASSESSMENT SCORES

Easily import your assessments scores, no matter the test. Pre-defined import layouts and a test file builder help schools bring in the data and use it throughout the system. Include all tests to a student record for their academic career.

INCORPORATE ASSESSMENT SCORES INTO YOUR MTSS AND SCHEDULING PROCESSES

By combining assessments scores with the Student Threshold feature, schools can automate identifications for MTSS based on defined criteria. For instance, if a student scores low on a reading assessment, a watch list identification can be made to identify the student so an MTSS referral or intervention plan can be made to level up the student.

INCLUDE ASSESSMENTS IN REPORTING AND CLOUD-BASED ANALYTICS

Assessment Information is available to the Skyward Report Designer (SRD) to use in operational reporting, for transcripts. If you are a DistrictPulse Cloud Analytic user, know that all assessments and scores can be available for visualization and longitudinal reporting.
