ATHLETIC/ACTIVITY ELIGIBILITY AND ACTIVITY MANAGEMENT
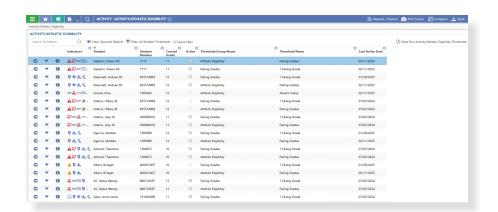

MAINTAIN SCHOOL ACTIVITIES AND PROVIDE TRANSPARENT ELIGIBILITY INFORMATION TO ASSIGNED LEADERS

SKYWARD® Qmlativ®

WSIPC

- Maintain activities, clubs, field trips, and their associated student rosters

- Designate associated activity fees and automatically assign those to students

- Provide activity leaders with access to student information on only the students on their roster

- Utilize district designated criteria to determine eligibility for students and display to activity leaders

MAINTAIN YOUR ACTIVITIES AND CLUBS

Whether for athletics or academics, track the different activities, clubs, or other various groups and their relevant student rosters. With each activity, you can additionally maintain any appropriate activity fees, requirements, events, and personnel.

PROVIDE ACTIVITY LEADERS ACCESS TO STUDENT INFORMATION

When assigning coaches or leaders to these activities, you can determine if they will have access to relevant information under Activity Access. Here, leaders can see details on their activities and student-specific information on just those students associated with the activity. You can set this up for a case manager to look up information on students on their case load, versus giving that manager access to all students' data through the full Administrative Access Portal.

ATHLETIC/ACADEMIC ELIGIBILITY DETERMINATION

Automatically determine student eligibility for their activity through use of thresholds assigned to each activity, such as athletic eligibility rules that a student cannot have a failing grade, not be in detention, nor be absent the day of an event. These rules can be scheduled to run as necessary and then display right on the activity leader's roster. There is no need for additional reports and transferring of that data to individual coaches.
