

FAMILY ENGAGEMENT

SCHEDULE BUILDER

SAVE TIME BY HAVING GUARDIANS/STUDENTS CREATE THEIR OWN SCHEDULE FOR A FUTURE TERM OR SUMMER SCHOOL.

- Intuitive User Interface
- Students have ownership of their own schedule
- Save administrative staff time with minimal conflict resolution and reduced paperwork and student meetings
- Date and Time restrictions allow for different groups to schedule at different times
- Ensure seniors get selections before others
- Administration can hide teachers and rooms from selections

CREATE STUDENT SCHEDULE

Students know their habits and when they are most productive. After the campus creates the list of courses that the student will be taking for the next school year, they can create the schedule matching classes to when they will be more apt to learn the material.

SCHEDULE ENRICHMENT PROGRAMS

With just a couple of clicks, guardians can easily sign up for Summer Enrichment Programs via the schedule builder. Real-time recording of the selections will ensure that the programs are not over-filled.

ADMINISTRATIVE CONTROL

Campus leadership will determine which courses a student may enroll in. Leadership will also determine which students may use the builder and when it will be available. The selection of courses can be those that have been previously entered as requests for students, or all courses. Not only will students have ownership of their schedule, but it also reduces the number of schedule conflicts that staff will need to clear up before the start of the school year.
