

STUDENT SERVICES

SECTION 504

IDENTIFY, TRACK, AND MANAGE INFORMATION TO PROVIDE STUDENTS WITH THE SUPPORT THEY NEED

- Fully integrated component that allows the district to easily manage and share required information to all support staff for the student
- Use the built-in customized forms manager to create personalized Individual Action Plans (IAPs) for students
- Data easily shared and accessible to parents via Family Access

EASILY ACCESSIBLE TO ALL STAFF (DEPENDENT UPON SECURITY ACCESS)

The section 504 component is fully integrated within the solution, allowing access to all related information about the student and easy management of the student support data. It is simple to share the information to staff who support the students' educational learning needs.

DEVELOP THE MOST EFFECTIVE PLAN FOR A STUDENT

The Section 504 component contains all the related data fields to create and maintain a full plan for a student, and to track progress. At the same time, it contains all state required fields for tracking and reporting. The district can maintain all the required dates, assessments given and results, the disabilities determined, goals and progress, impairments, and life activities. This allows a district to create an effective Individual Action Plan (IAP).

FLEXIBLE SETUP AND CONFIGURATION

The section 504 component offers great flexibility in setting up and using the module. The district determines what information they want to track and how, what strategies you will use to assist students, and more. Being fully integrated eliminates time-consuming paper processes and best of all, as the student progresses through the district, all the data follows them.
