

IDEA Platform: Common K-12 Use Cases and Features

Join IDEA Enterprises for a live demonstration of how the IDEA Platform helps school districts manage facilities, maintenance, projects, safety, visitors, and operational resources from one system.

Topics will include:

Mobile Operations

- Create work orders
- Request 911 or internal emergency support
- Support student checkout and reunification
- Check visitors in and out

Work Orders and Preventive Maintenance

- Create, search, filter, assign, and update work orders
- Export records for reporting
- Schedule recurring maintenance tasks

Project Management

- Create projects and tasks
- Link existing work
- Track spending against budget
- View progress in a Gantt chart

Directory and Resource Management

- Search staff, and vendor records
- Store contact details, skills, and labor rates
- Assign assets and review work history

Dashboards and Analytics

- Monitor team workload, asset activity, costs, and operational performance

The session will conclude with a live question-and-answer period.
