Connected Schools Ensure Communities Thrive

Parent-Teacher Communication

Expand access to platforms like Zoom and parent portals, especially in under-resourced areas.

Classroom Technology

Support smartboards, tablets, and other connected devices to enhance interactive learning.

Remote Learning

Ensure students have reliable internet access for online classes, assignments, and virtual collaboration. We are the E-Rate substitution without the paperwork and uncertainty.

Backup Connectivity

Maintain essential systems like alarms and smart lighting for safety and efficiency.

Connected School Buses

Equip buses with Wi-Fi to support student learning during commutes.

With reliable wireless broadband and the right connected devices, schools can help close digital equity gaps by offering:

- Reliable connectivity so students can access learning resources
- Connected devices that support classroom + at-home learning
- Tools that help teachers engage students in new ways
- Better connections with caregivers and families
- Scalable technology that supports today's K–12 needs

Connected Libraries Power Limitless Possibilities

mission TELECOM

Wi-Fi Hotspot Checkout Program

Provide students and job seekers with internet access for online courses, research, resume building, and virtual interviews, ensuring everyone has opportunities to grow and succeed.

Bookmobile

Keeping library bookmobiles connected brings digital resources, Wi-Fi access, and online services to patrons wherever they are. It's a mobile connection to opportunity, learning, and community support.

Digital Literacy Programs

To bridge the digital skills gap, empower patrons with training sessions on internet navigation, online safety, device usage, and essential applications.

Secure Telehealth

Secure wireless broadband empowers patrons to access telehealth services with confidence—supporting virtual doctor visits, mental health care, and chronic condition management from the comfort of home or community spaces. Reliable, private, and easy to use.

Community Events & Hybrid Programming

With seamless broadband connectivity, support virtual and in-person events such as book clubs, author talks, workshops, and job fairs. Enable access to digital collections and streaming resources.

Maker Spaces & Innovation Labs

High-speed, reliable internet is essential when patrons use it for cutting-edge technology like 3D printers, virtual reality stations, coding kits, and digital media tools to foster creativity and hands-on learning.

With reliable internet and the right tech, libraries help close the digital divide by offering:

- Free public Wi-Fi so everyone can get online
- Digital literacy programs that build real-world skills
- Maker spaces where creativity and innovation thrive
- Workforce development resources to help people find jobs
