COMPREHENSIVE SCHOOL
SAFETY & OPERATIONS
SOLUTION THAT INTEGRATES
WITH **YOUR** SIS!

ID MANAGER STATION	VISITOR MANAGER	CLASSROOM ATTENDANCE	BUS ATTENDANCE	BEHAVIOR INTERVENTION	LARGE GROUP ATTENDANCE	HALLWAY MONITORING	DOOR ACCESS	CAFETERIA POINT-OF-SALE	ONLINE STORE
Create smart card photo IDs for an entire district or a single campus. Even the youngest students can participate quickly and easily with a smart card ID - just tap and go.	Control and manage visitor traffic to increase student safety and campus security.	Keep accurate in-class "seat time" attendance.	Know where and when a student gets on or off. Administrators can act promptly to address behavior or safety issues. Students tap their ID on the classroom reader.	Empower teachers to paperlessly document and manage student behaviors. Parents and administrators stay informed and can quickly address developing behavior problems or reinforce positive behaviors.	Process arrivals quickly and push data to SIS. Students tap their smart ID card on the attendance kiosk as they begin their day, logging building attendance in seconds.	Enhance security and decrease hallway traffic with the ScholarChip Mobile App. Quickly recall and verify a student's identity, class schedule and attendance record.	Protect entrances and access points with role-specific admittance for teachers, students, staff and scheduled workers.	Tap a smart ID to automatically update the student's account. The user-friendly interface gives your lunchroom attendants the tools they need to process lunch lines quickly and accurately.	Establish an on-line campus store for a quick and easy way to encourage school spirit and increase revenue.
Each highly secure, encrypted smart ID is specific to an individual but carries no personal data.	Visitor Manager checks district and campus records as well as ScholarChip's national sex offender database.	Return up to four minutes of instruction time per class period by transferring attendance accountability to the student.	Bus attendance is taken when a student taps their ID on a card reader to record the location and time they entered or left the vehicle.	Interactive, age-appropriate learning modules help students reflect on their actions and potential consequences to promote positive behavior and better choices.	Trigger alerts as students enter the building and automatically record late arrivals and issue tardy passes.	Check for class cuts and disciplinary actions and send paperless incident details to administration.	Manage door access rights from your SIS or management site and enable automated lock down via the web or IVR (Interactive Voice Response).	Processes free and reduced lunch records. Federal and payment industry compliant.	Students, parents and school supporters can purchase branded merchandise, event or sports tickets, books, and supplies. Pay on-line securely.
Students, staff and volunteers are issued smart IDs that can be deactivated immediately should a card be stolen or lost.	Quickly identify anyone that should have limited access or be prohibited from campus.	District-wide data improves safety and retention. Highlights problems for early intervention.	GIS mapping shows where a student tapped their card to board or depart.					Contact your regional representative for more information and to learn more about the Smart ID Card Starter Kit program and K-12 Subsidy.	ARMET Group ARMETGroup.com 828-604-4920 A new name for a select association of well-established identification management providers and solution integrators.
